Job Specs:

Construction Type New
 Type of Project Hospitality
 General Contrator Steelcrete,
 Houston, TX

7 Days Allotted

The crew from Exterior Solutions USA completed the installation under budget and ahead of schedule.

12,500 sq. ft. of RevealShield IT Integrated Tape was installed on La Quinta Inn and Suites in Spring, TX.

Equipped with **vast product knowledge** and a **network of top manufacturers**, Exterior Solutions USA was able to offer the General Contractor two WRB/Air-Barrier solutions; one budget-friendly option and another high-performance option. In interest of the specified budget, the client opted for the economy solution and work commenced immediately.

After staging the project for optimal **application sequence**, Exterior Solutions USA installed RevealFlashing SA Self-Adhered around all rough openings, with Vapro-SS Flashing and VaproBond applied over top. Existing specified WRB was then covered to accommodate the open-joint ceramic cladding. To ensure water holdout and **air barrier continuity**, the crew created a 6" WRB interface over the existing WRB, in accordance to the original specifications.

Once the installation was complete, Exterior Solutions USA finalized the job with an **owner-performed QA inspection**. Although the project had tight cost constraints, the crew completed the installation under budget and ahead of schedule.

Product	Used/Sq.ft. or Lin. Ft. or Pieces	Manufacturer
Air Barrier/ WRB System	12,500 sq ft RevealShield IT Integrated Tape	VaproShield®
RO Opening Flashing Materials	Vapro-SS Flashing, RevealFlashing SA Self-Adhered VaproBond	VaproShield®

PROVEN Results

Once the installation was complete, Exterior Solutions USA finalized the job with an owner-performed QA inspection.

Exterior Solutions USA installed RevealFlashing SA Self-Adhered around the building's many rough openings, with Vapro-SS Flashing and VaproBond applied over top.
